# PLANNED SOCIETY

YESTERDAY - TODAY - TOMORROW

EDITED BY FINDLAY MACKENZIE

---

THIS WORK, in one volume, gives an authentic, composite picture of what planning means to modern America.

MR. LEWIS MUMFORD, in his Foreword to the book, points out that planning "demands for its success not an authoritarian society, but a society in which free thought and voluntary action and experimental effort still play a major part in its existence; a society where differences are composed by rational means rather than by the external repression of the concentration camp and the execution block, and where new paths can be opened and old mistakes corrected without undermining the very basis of authority."

Divisions of the book: I. Economic Control in Primitive, Ancient, and Medieval Societies. II. Economic Control and Nationalism. III. Control and Planning in Particular Areas of Economic Activities. IV. The Control and Planning of All Economic Activities.

The writers include: Wesley C. Mitchell, W. F. Ogburn, E. C. Lindeman, Margaret Mead, W. H. Steiner, Sterling Tracy, Arthur E. Morgan, Gustav Cassel, Rudolf K. Michels, J. Russel Smith, Sidney Hook, J. Wilner Sundelson, Harold D. Lasswell, Harlow S. Person, George Soule and eighteen other eminent authorities. Also two world-famous papers by Mussolini and Stalin, reprinted by permission.

#### The Boston Transcript:

"A more timely book cannot be found on a publisher's list, on a bookshop shelf, or a public library's 'stack.' For in these days of social unrest and wholesale prescriptions for curing the ills of a depression sick world the theory of a planned society has marched more and more to the fore. \*\*\* Readers who wish to know what planning is and how it applies to their daily life will find this book a mine of information. Factually it is without a peer. Its editorship needs nothing to be desired."

#### The Washington (D. C.) Post:

"Merits close attention, first, because of the eminence of many of the contributors, and, second, because of the fundamental nature of the subject under consideration. \*\*\* It is not often that the covers of one volume are planned to encompass such a number of contributors on problems so varied and deep-reaching."

#### St. Louis Post Despatch:

"Deserves a careful reading because it reflects the attitudes of able authorities of the question and indicates the magnitude of the problem to be solved."

#### The Kansas City Star:

"This comprehensive volume, to which thirty-five responsible writers, including economists, sociologists, and statesmen have contributed, surveys new orientation of social thinking and effort."

#### Editor and Publisher:

"If you do any serious reading, you'll want to read this book and will be likely to pass it on to your friends."

#### Review of Reviews:

"This is the most nearly complete book on the subject that has yet been published, and there is something in it for any intelligent person."

The book's greatest contribution is that of providing case material for the analysis of planning and control, and precept and example for their efficient manipulation.

Here, then, is an ideal text for courses dealing with government, business, and economic theory. College teachers giving courses in any of these subjects are invited to send for a copy of **PLANNED SOCIETY: Yesterday, Today, Tomorrow** on three months' examination. Decide **TODAY** to send for the book and consider it with a view to adoption. When writing, please use your college stationery and give your official position.

989 pages 6×9 inches, \$3.75 list.

**Prentice-Hall, Inc. 70 Fifth Avenue, New York, N. Y.**
